# Chris Cogbill

Solutions Architect | 10+ years delivering complex enterprise implementations | Python, JavaScript, SQL, REST APIs | Cambridge Physics graduate

## Experience

### SystemsAccountants

**Jul 2025**

#### Principal Consultant - Unit4 — *London*

As Principal Consultant I take ERP implementation, migration and improvement projects from sales and solution demos through to delivery. I mentor junior consultants and manage contractors on our larger engagements.

**Key Projects:**

- **Care UK:** Engagement began with Care UK's acquisition by Welltower (a US real-estate investment trust) and five care-home acquisitions migrated into Unit4. The client later returned, having first trialled a cheaper Unit4 partner, and I have since led the well-publicised **Danforth** and **Aria Care** acquisitions (~100 care homes across 50+ legal entities), helping grow Care UK into one of the two largest care-home providers in the UK. All delivered to tight deadlines.
- **City of Medicine Hat:** Bid for and ran an intensive Unit4 health check, shaping an ongoing improvement programme, now into its second year, including rewriting report templates to be cloud-compliant using AI.
- **Triton:** Bid for and delivered an integration between their internally developed AP system and Unit4's general ledger. Led to a continued support engagement for one of our more junior consultants.
- **Developed Report Migration Tool:** Built the rerx converter, a web tool built in Python that automatically migrates legacy Unit4 report templates to the cloud reporting format, replacing a manual rebuild of each report.

**Dec 2022**

#### Senior Consultant - Unit4 — *London*

Moved back to London after 5 years in the US, continuing as a Unit4 specialist with a mix of US, Canadian and UK clients.

**Key Projects:**

- **Havas UK:** Implemented reporting for utilisation and client profitability, plus set up a REST API interface to Power BI. Leveraged existing relationships from US-based Havas work to win this project.
- **Medical Teams International:** Rescued a failing P2P (purchasing) implementation that couldn't raise a single purchase order when I took over. I delivered full purchasing with workflow automation and was later re-engaged for financial reporting advice.
- **Oanda:** Full planner and commitment accounting implementation delivered from scoping to production in under a month.
- **College of Medicine Hat:** Implemented the Unit4 Fixed Assets and T4A (Canadian tax document) modules.

## Technical Skills

**Unit4 ERP (including ERPx)**

- Record-to-Report (GL)
- Purchase-to-Pay
- Sales-to-Cash
- Planner (Budgeting)
- Fixed Assets
- Report Engine
- Integrations
- REST APIs
- Extension Kit
- SOAP Web Services

**AI Development**

- Claude API & Agent SDK
- MCP servers
- Claude Code
- Agent Skills

**Back-end Development**

- SQL (MS SQL, PostgreSQL)
- Node.js + Express
- Python

**Front-end Development**

- HTML, CSS, JavaScript
- React.js
- Git / Version Control

Mar 2017

### Senior Consultant - Unit4

*Chicago*

I joined SystemsAccountants' US operation (then 6 employees) and helped grow it to 100+ staff across three offices. The work with Havas made them SA's biggest global client by total revenue.

**Key Projects:**

- **Havas Worldwide:** Helped migrate ~60 agencies onto Unit4 ERP over 5 years. Predominantly worked across the New York, Boston and Chicago offices. Led Planning, Budgeting and FP&A reporting setup.
- **Havas Media:** Won and led SystemsAccountants' first large-scale implementation. Headed the consulting team across two phases including AP and Fixed Assets.
- Also delivered projects for the University of Toledo, The Reinvestment Fund and Hycite, and authored a successful Unit4 upgrade bid for Oanda.

## Cogs Technology Solutions

Oct 2015

### Independent Consultant

*London*

I set up my own business providing consulting services and contracted predominantly to the UK Atomic Energy Authority (UKAEA) as well as to Methods (my previous employer).

**Key Projects:**

- **UKAEA:** Full-cycle Unit4 ERP implementation (HR and finance). Progressed from lead financials consultant to solution architect and delivered on time. Set up and trained their support team before departing.

## Methods Consulting

Dec 2014

### Senior Consultant

Apr 2014

### Consultant

Jun 2013

### Junior Consultant

I joined Methods as a graduate and was promoted twice in 18 months to become the youngest senior consultant across the group.

I delivered Unit4 implementations and upgrades for clients including West Suffolk Shared Services, Middlesbrough Council, and Macmillan Cancer Support.

Prior to focussing on ERP, I was part of the team that did the first Salesforce implementation into local government (London Borough of Hounslow).

## Education

## University of Cambridge

2009 – 2012

### BA (Hons) Natural Sciences

Physical Natural Sciences — Grade 2:1

## Professional Skills

### Sales

- Bid writing (win rate >90%)
- Presentations / Demonstrations
- Unit4 report engine demo on YouTube with >10k views
- Upselling — 6 clients who started with minor projects and later engaged us for upgrades / cloud migrations / reimplementations

### Project Management

- Agile
- Waterfall

### System Design

- Understanding complex requirements
- Implementing within system limitations

### Training & Mentoring

- Mentoring junior consultants
- Managing contractors on larger engagements

### Finance & Accounting

- Financial Reporting
- Budgeting Best Practices
- Month and Year End Processes
- US / Canada / UK tax
- Fixed Asset Treatments
- Multi-entity consolidation and acquisitions

## Side Projects & Ventures

- cogs.tech: a suite of small web apps I design, build and run, with shared sign-in, deployed on Railway and Cloudflare
- now / next / later: a task-tracking app that integrates directly with Claude
- day / week / year: a calendar that unifies other providers' calendars and integrates with now / next / later for task scheduling
- SharePicker: a share valuation algorithm and dashboard for FTSE stocks, tracked against real market outcomes
- FPL xP: a Fantasy Premier League expected-points model built on official Opta data
- Fantasy NFL, PL Picker and World Cup Pool: prediction games built for friends
- Clubhouse Mobile Mini Golf: founding investor in a successful mobile mini-golf business

## Other Interests

- Voluntary Tutoring (The Access Project and Oxbridge Interviews) and Reading Help (Coram Beanstalk)
- Fostering and Adoption
- Rental Property Management
- Sport (Crystal Palace fan)
